IMPLEMENTATION TRAINING₄

Common workplace problems

- 🧐 Absenteeism
- 🧐 Demotivated Employees
- 🧐 High employee Turnover
- 🧐 Mistakes/ errors
- 🧐 Disordered/cluttered environment
- 🧐 High Inventory
- 🧐 More Scraps

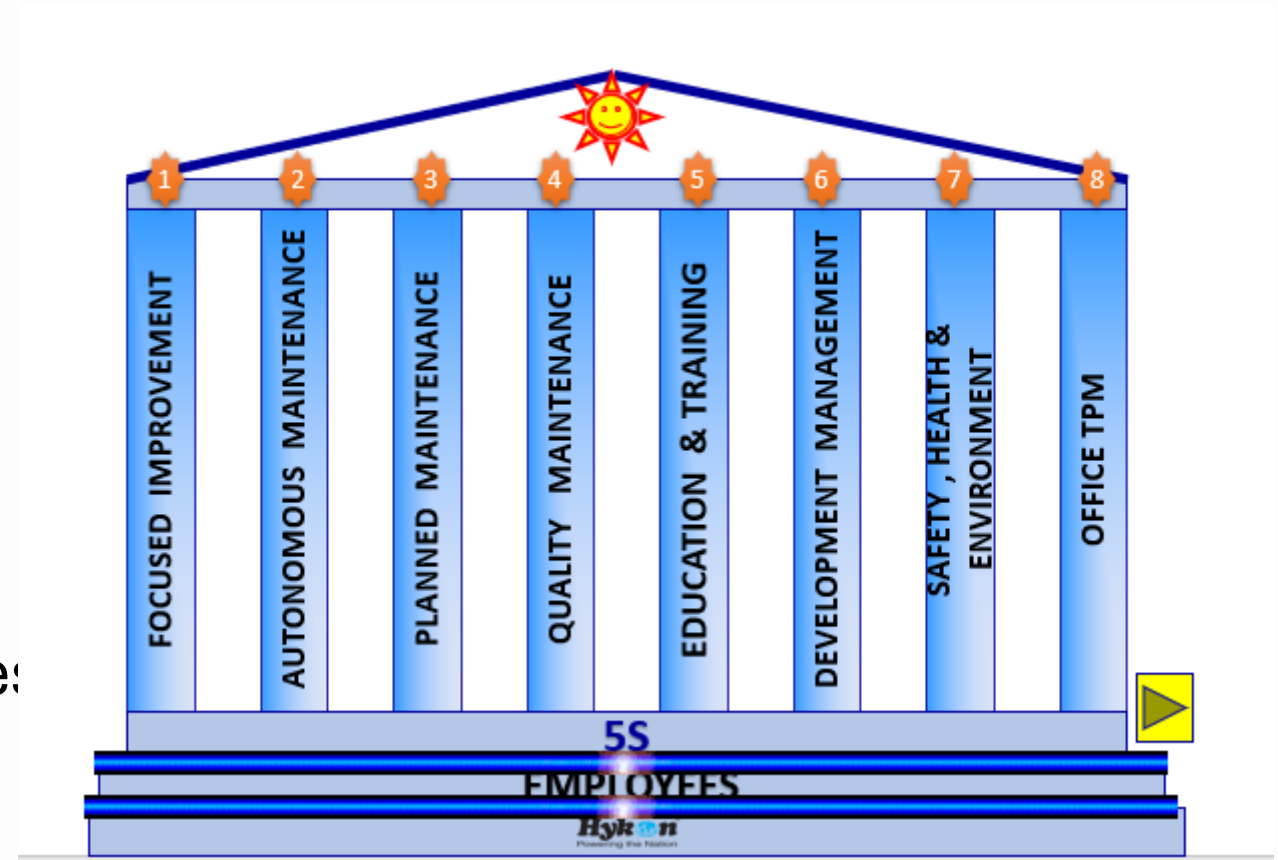

The Solution : 5S

- ♣ 1S (Seiri): Sort.
- ♣ 2S (Seiton): Set in Order.
- ♣ 3S (Seiso): Shine.
- ♣ 4S (Seiketsu): Standardize.
- ♣ 5S (Shitsuke): Sustain.

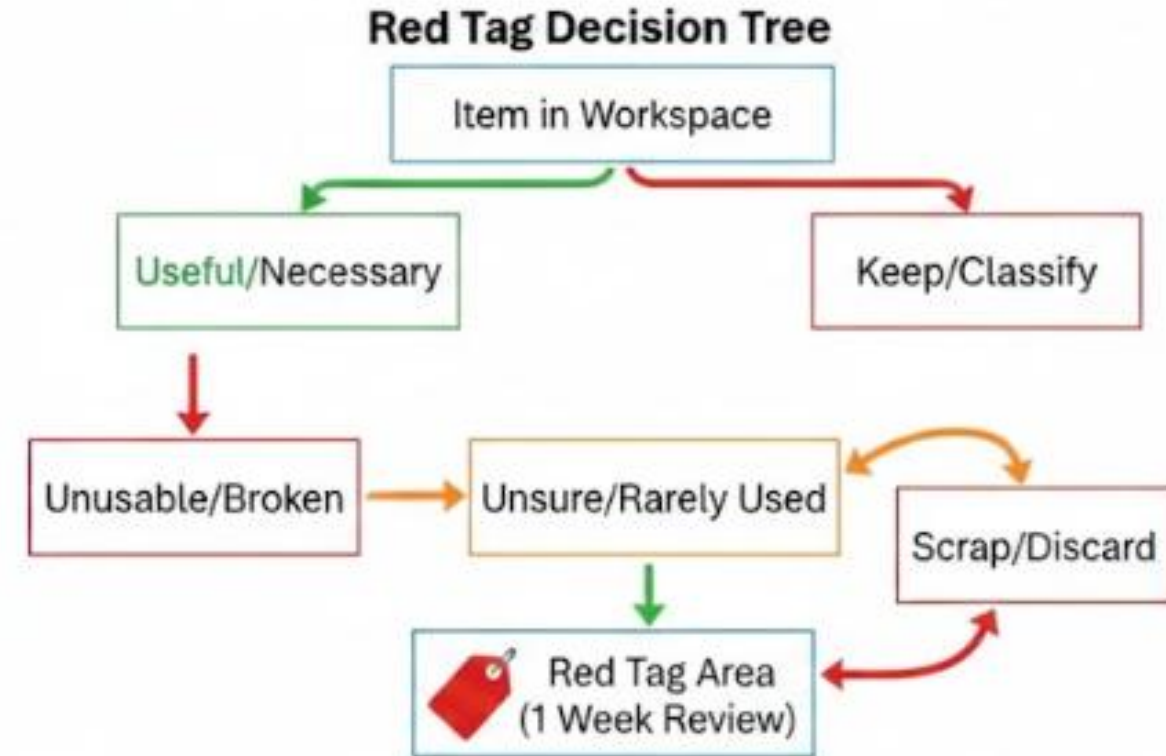

What 5S actually is...

- Foundation of all QC Tools
- Continuous Quality Improvement
- Lean Manufacturing
- Kindergarten of Quality Tools & Techniques

Step 1 SORT (Seiri) “Clearing the Workspace”

- **Identify Essentials:** Evaluate every item in the workspace to determine its necessity.
- **Remove Clutter:** Clear out unnecessary items, broken tools, and unusable materials
- **Classification & Storage:** Organize necessary tools, gauges, and materials into defined categories before storage.
- **Red Tag Strategy:** Move suspected unnecessary items to a designated "Red Tag Area" for one week of re-evaluation before disposal

Advantages of Red Tag System

Red tag will set a Thinking culture in the Zones

01

Keep your senses open

02

No idle item should consume space at your work place

03

Defects must be documented and monitored consistently

04

Make all defects visible

Unwanted items

Removed & disposed off

Setting Priority for Sorting...

PRIORITY	FREQUENCY OF USE	HOW TO USE
Low	Less than once per year Once per year	Throw away Store away from the workplace
Average.	Once per month Once per week	Store nearby ; but not on your desk / workplace
High	Once Per Day	Locate at the workplace

Step 2 : SET IN ORDER (SEITON)

- ♣ **Core Principle:** "A place for everything and everything in its place"
- ♣ **Eliminate & Arrange:** After sorting, systematically organize all remaining items
- ♣ **Strategic Layout:** Assign **designated locations** based on frequency of use
- ♣ **Visual Controls:** Use **floor markings, labels,** and **shadow boards** to make locations self-evident.
- ♣ **Accessibility:** Ensure items are at the "**point of use**" to reduce wasted motion

Visual Colour Code Palette

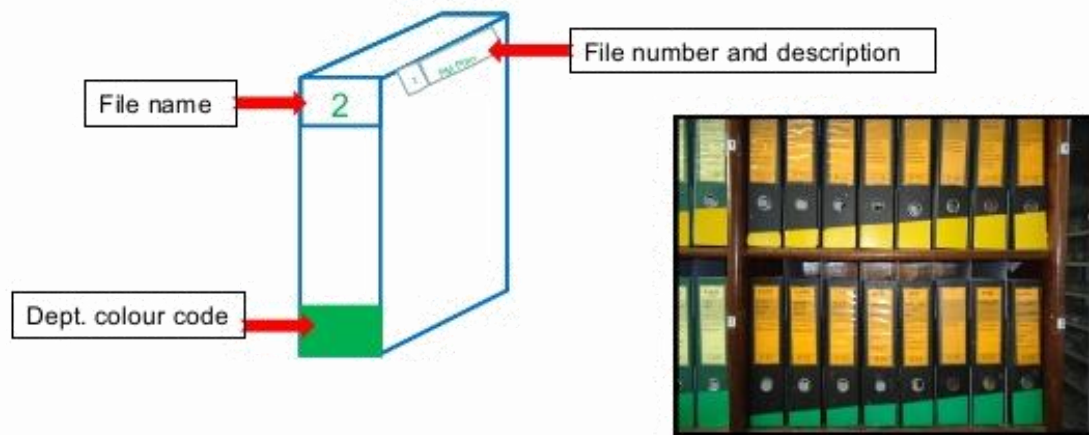

YELLOW	For Defects, the Red Tag area, or Scrap
RED	For Defects, the Red Tag area, or Scrap
ORANGE	For Product Inspection or Energized equipment.
GREEN	For KANBAN or the Finished Process stage.
BLUE	For Tools and Equipment..

Set In Order– Check Points

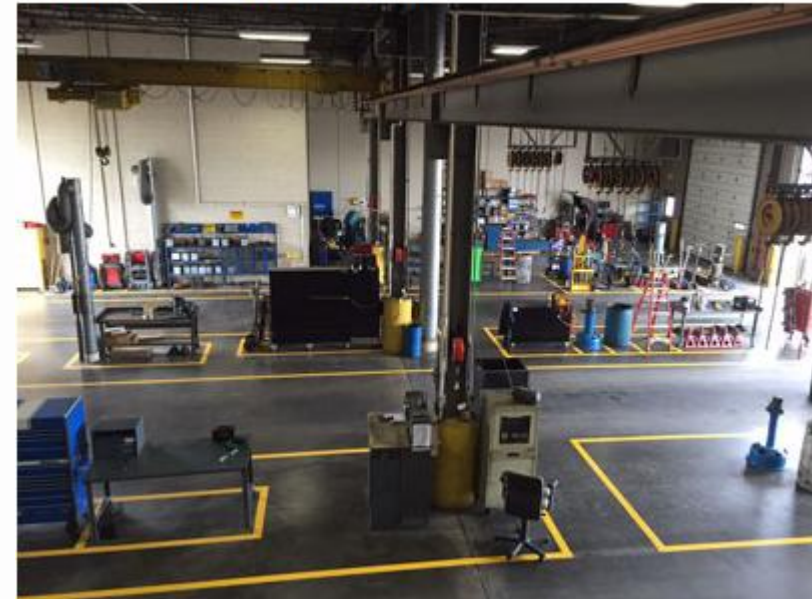

Workplace Checkpoints:-

- ✓ Positions of aisles and storage places clearly marked?
- ✓ Tools classified and stored by frequency of use?
- ✓ Pallets stacked correctly?
- ✓ Safety equipment easily accessible?
- ✓ Floors in good condition?

File Management for 5S Standard

Production floor markings

Step 3 –SHINE (Seiso)

Core Objective

Spotless Workplace: Create an environment so clean that abnormal situations (leaks, loose bolts) are immediately apparent.

Cleaning as Inspection: Shift the mindset from "janitorial work" to "equipment maintenance".

Key Advantages

- **Safety Enhancement:** Removing oil leaks and clutter drastically reduces slip and trip hazards.
- **Productivity:** Tools in top condition fail less often, reducing downtime.
- **Motivation:** A bright, professional environment improves employee morale and company image.

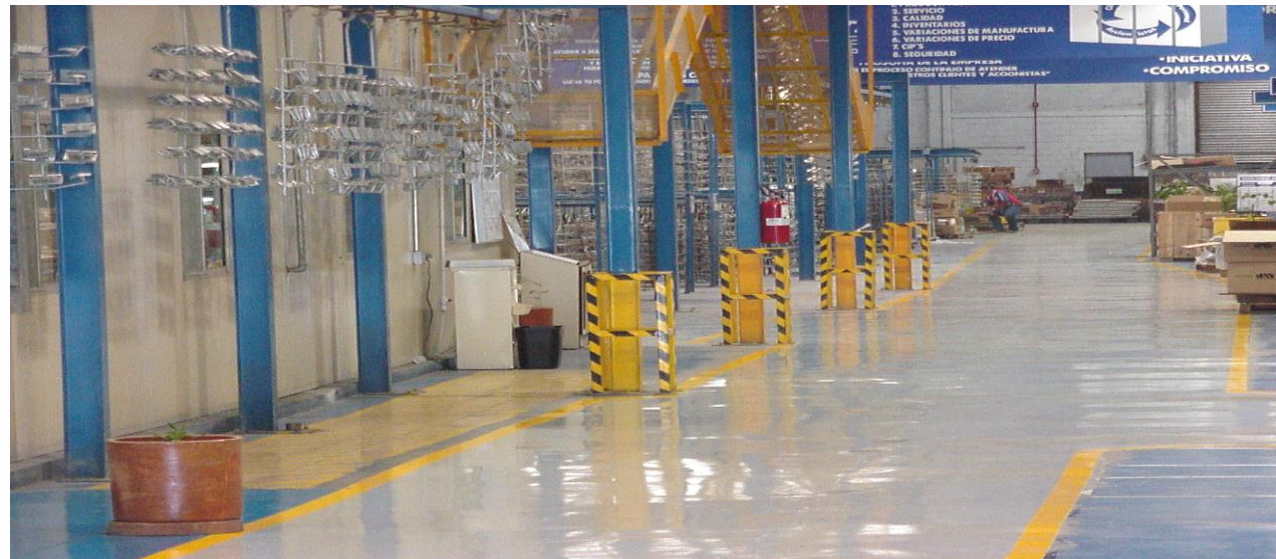

Step 3 –SHINE (Seiso)

Implementation Steps (The "How-To")

- **Divide into Zones:** Break the workplace into specific grids and assign clear ownership to each team member.
- **Define Responsibilities:** Every piece of equipment must be "owned" by an individual for maintenance and cleaning.
- **Cleaning Routine:**
 - **Daily:** 5–10 minutes for quick sweeps.
 - **Weekly:** 15 minutes for deeper cleaning.
 - **Monthly:** 1 hour for detailed area maintenance.
- **Target Areas:** Sweep, dust, polish, and paint to identify causes of dirt and grime at their source.

Step 4 - STANDARDISE

- **Systematize:** Create a formal maintenance system for Sort, Set in Order, and Shine
- **Standardized Tools:** Utilise uniform procedures, schedules, and visual labels company-wide
- **Continuous Assessment:** Regularly audit the workplace using standardised checklists to prevent regression
- **Visual Control:** Use standard signs and safety markings to make abnormalities readily apparent

Step 5 SUSTAIN (Shitsuke) – “Self-Discipline”

- **Core Concept** :Develop self-discipline and instill good habits across the workforce
- **Constancy of Purpose**: Change Deming's point to "Maintain a Constancy of Purpose: Make 5S a standard way of life, not a one-time event“
- **Integration**: Integrate 5S into the Health and Safety culture of the organization.

SUSTAIN (Shitsuke) – “Success Factors”

- ✓ **Track & Post Progress:** Display status reports, charts, and graphs in work zones to visualize performance.
- ✓ **Management Involvement:** Schedule periodic reviews by unit heads and senior management to show commitment.
- ✓ **Recognition & Reward:** Implement a "Monthly Best Zone" award to foster healthy competition and motivation

LITMUS Test for 5S

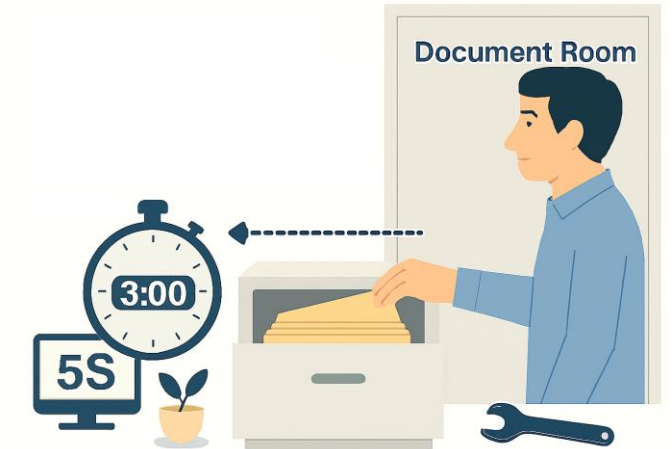

30 Sec Rule

One must retrieve the item within arms length in 30secs if 5S is maintained properly.

2-Min Rule

One must locate a document /item from the nearby storage space in 2 min.
Also applies for Electronic records retrieval

3-Min Rule

One must locate a document /item if it is not nearby in 3min

Benefits of 5 S Implementation

Stepwise Implementation

1. Training on 5S
2. Photograph – work place – Before
3. Stick Posters - All dept
- 4. SORT – involve all employees**
5. Use 2 hours to Sort all items and identify clutter
6. Reduce workspace clutters
7. Red tagging
8. Dispose unused items
9. Provide Red Tag
 - One member should be responsible for the red tag areas
 - There should be Unit level red tag area and company wide red tag area

Stepwise implementation

10. Identify Red Tag Area

- Display red tag process
- Review & clearing of red tag
- Prepare report

11. Set in Order

- Dedicate areas for the storage of each item
- Make it virtually identifiable -Trays/ boxes etc
- Establish labels/ stickers /standard signs
- Uniformity in signs/stickers/ labels
- Follow National safety signs while defining standards

12. Paint – Tin / Can

13. Sticker – Lines, rounds, square, labels

14. Poly foams – for making trays

15. Multi-wood – for tool boards

Stepwise implementation

16. Photograph – after

17. Shine – Clean the area thoroughly

- Daily – 5 min to 10 min
- Weekly – 15 min
- Monthly – 1 hr

18. Standardize

19. Sustain

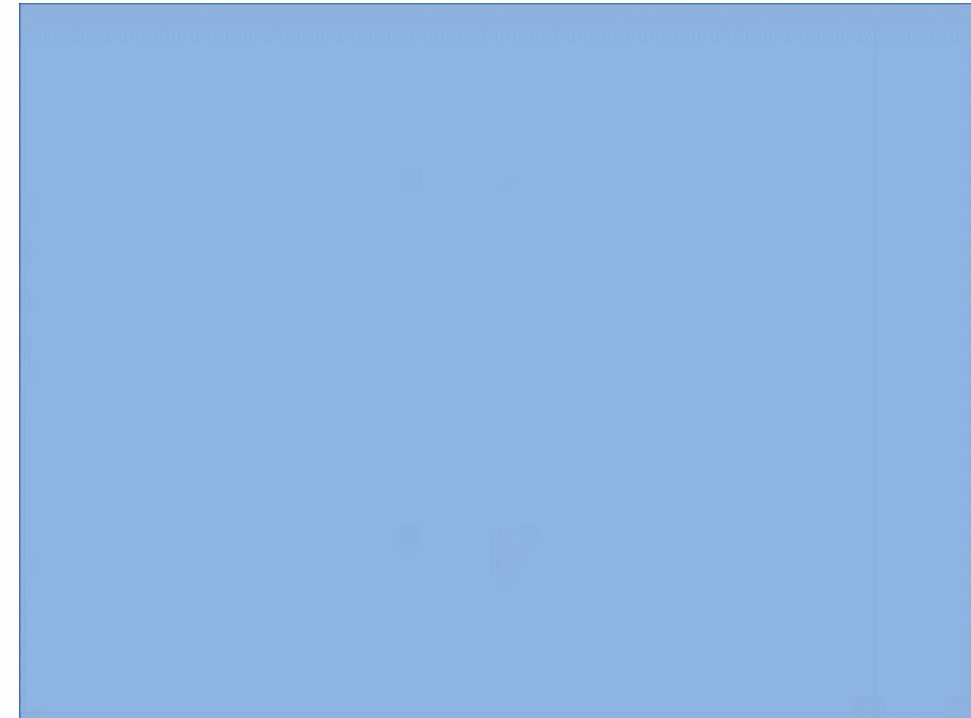

- Track progress
- Measure achievements
- Post status report
- Display reports with charts and graphs
- Periodic review by unit heads/ management

20. Monthly Best Zone declaration

5S- Day

Agenda: Execution of Special 5S Day

Time	Topic	Note
7:30-8:00	Arriving / check site and final briefing	On site
8:00-30	5S Briefing Presentation; team, zone, time table, objectives	All
8:30-9:00	Move out everything out of zone and damp un-useful in the garbage zone.	1S 2S
9:00-10:00	Un-useful in the garbage zone.	1S 2S
10:00-15	Clean the central garbage zone	1S
10:15-11:15	Cleaning from the higher level toward lower level	3S
If possible	Coffee break by team for max 15 min	
11:15-12:00	Water cleaning on the floor	3S
12:00-13:00	Lunch break	All
13:00-45	Making painting line and start painting	4S
13:45-15:00	Painting and implement improvement idea	4S
15:00-45	Putting back useful items on the place	2S
15:45- 16:15	Presentation of each zone	5S
16:15-30	Coffee break	
16:15- 30	Post 5S photo taking and evaluation	Implementers
16:30-17:00	Prize and Gift	Implementers
17:00	Depart from the site	

5S – Tray making

We can make Trays to keep our daily use items within reach for easy access.

What we can harvest at the end of the day from 5S Implementation

1. Neat and Clean workspace
2. Smooth Working
3. No Obstructions
4. Safety Increases
5. Productivity Improves
6. Quality Improves
7. Wastage Decrease
8. Machine Maintenance
9. Visual Control System
10. Employees Motivated
11. Workstations Become Spacious
